Flutter Live Coding Challenge [2 Hours]
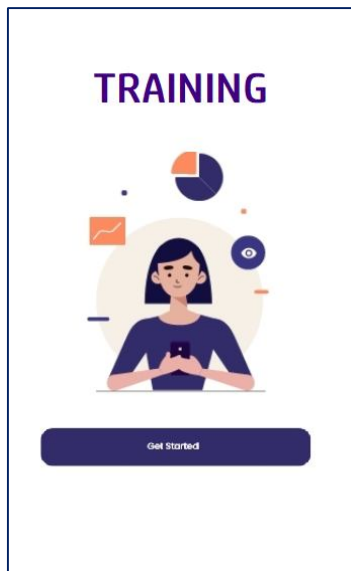

A Student has to create an App keeping following points in mind:

1. There will be three screens in this App.
    a. Get Started
    b. User Login
    c. Training Completion

2. User click on Get started and move from Screen-1 to screen-2

3. On Screen-2 User will enter Student Name and Password as TextFields.

4. Add validation, no filed should be blank in name and email.

5. User click on Login, user will move from Screen-2 to screen-3 (Completion Screen) and it will send the student name on Screen-3

6. Display Hi, [Student Name] received as data from previous screen.

7. There will be no Appbar widget on Screen-3.

8. Add Flutter Logo as Splash Screen

9. Add Date on Screen three using Date Function at bottom right Corner.

10. Create Repo on GitHub and share final code using GitHub link only. Don't share code directly.
